SUMMARY

I am a frontend developer with 3 years of experience building fast, elegant and intuitive interfaces using **SvelteKit**, **Tailwind CSS**, and **TypeScript**. I care equally about how things look, how they feel, and how they work, ensuring every detail supports both usability and business goals. With a strong eye for design and strategic thinking, I bring attention to detail and a collaborative, open-minded approach to every project.

TECH SKILLS

Frameworks | Libraries - SvelteKit, React, Redux

Languages - JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS

Styling - Tailwind CSS, Styled Components, MUI, BEM

Testing: Vitest, Storybook

Tools - Git, Webpack, Babel, Vite, Figma, Affinity Designer

Backend & DB - Firebase, Firestore, Prisma

Other - Quill.js, SEO optimization, UX Writing, Lighthouse Performance, Accessibility

WORK EXPERIENCE

Frontend developer | [Arts.center](#)

Remote | December 2022 - June 2025

- Designed and built the frontend of a niche art marketplace using SvelteKit, Tailwind, TS.
- Rebuilt a slow MVP into a smooth, responsive, and intuitive product
- Owned frontend architecture, UX/UI design, and performance optimization
- Took ownership of performance, accessibility, and SEO, achieving strong Lighthouse scores and improved discoverability
- Wrote reusable UI logic with Storybook, focused on clarity and maintainability
- Built most of the site's features, managed product structure and UX from the ground up
- Implemented a rich-text editor similar to Medium using Quill.js and Parchment for advanced content editing and formatting capabilities.
- Wrote tests with Vitest to check that key components work correctly and stay stable during development.
- Took initiative in every phase: product thinking, wireframing, design, development, testing

Junior frontend developer | Freelance Projects

Remote | 2021 - 2022

- Delivered small-to-mid scale web projects using React, JavaScript, and Firebase focused on usability and responsiveness.
- Built and styled responsive interfaces, focusing on layout consistency and mobile-first design
- Applied UX/UI principles including navigation flow, modals, pagination, and real-time search

Tech: React, Redux, TypeScript, JavaScript, UX&UI, Firebase/Firestore

Projects: [React Blog](#), [Filmoteka](#), [Image Finder](#), [Oh my donut](#), [Web Studio](#)

Project manager | Event Designer

Kyiv, 2016 - 2021

- Led full-cycle event design production from concept development to execution for corporate and private clients
- Handled budgets, schedules, communication with clients, and coordination with suppliers
- Supervised cross-functional teams and freelancers under tight deadlines
- Learned how to plan clearly, solve problems creatively, and stay flexible, all of which now help me as a developer
- Developed transferable skills in communication, structure, and user empathy

PERSONAL QUALITIES

Responsibility, creativity, empathy, determination, discipline, ability to work in a dynamic environment, willingness to grow, teamwork skills.

LANGUAGES

English - B2
